

## 3.1. SUSTAINABILITY POLICY

**PUERTO ANTILLA GRAND HOTEL** is firmly committed to the 2030 Agenda and the 17 Sustainable Development Goals (SDGs) along with its 169 targets. We are dedicated to promoting sustainable development and maximising the positive impacts our organisation has on society, the economy and the natural environment. Our main objective is to efficiently meet the needs of our stakeholders, without compromising the needs of future generations or the environment surrounding the organisation.

To fulfil this commitment, we have defined and approved a sustainability policy that is reviewed annually by management. We have multiple communication channels, accessible and available, to continuously inform, engage and maintain this policy with all stakeholders of the organisation. This includes our staff, who, together with management, are responsible for complying with all of the sustainability principles, values and commitments detailed below.

## 3.2. COMMITMENTS

### Sustainability

Sustainability is the fundamental basis of our actions, thus aligning our strategy with compliance with the SDGs and the 2030 Agenda approved by the United Nations in 2015.

### Ethics and responsibility

Ethical and responsible behaviour to ensure the efficiency of our activities without compromising the environment around us and to guarantee a dignified and fair working environment.

### Transparency

Transparent communication with our stakeholders, ensuring that their expectations and needs are met at all times.

### Continuous improvement

Continuous monitoring of our performance with respect to SDG compliance, applying corrective actions if necessary to continue improving year after year.
